## **Translation My Opinion about EU and NATO RTV, Slovenia**

### **Luan, Milenko, Aleš, David**

- Well I haven't been paying too much attention and I don't know when we will join the EU. We will be part of the EU but salaries will be the same at the same time prices will go up. I don't like that.
- I think the EU is good on one hand, on the other hand not. I don't think this is the right thing for such a small country.
- There is no point in joining the EU.

Now you have to wear a helmet when you drive on your scooter and it has to be registered and you need a licence. It makes no sense.

I think it's stupid.

- You're right we should be an independent country. But on the other hand it is good for us to join the EU.

- Sort of...

- We will make ourselves valued more in other parts. We will have greater opportunities if we go somewhere else or something like that....

... it won't help.

This will not be good for us.

### **Andreja, Lidija**

- I think it will be better for us once we are part of the EU.
- I agree. Just think about studying abroad it will be a lot easier to study abroad. And then the possibilities to get a job, getting to know other people and cultures.
- Yes, this is relevant for young people but not for the older generation and that is why the older generation is against it.

### **Primož, Sergej**

- Yes, I was watching something. It is good that we will have the Euro and that taxes will go down. But I'm against NATO, because if anything should happen in any country, for example Germany, then we will be also involved.

## **Tina, Domen**

-O, this is really selfish of me, maybe because my French is quite good and so I might get a good job. Otherwise, I'd rather not admit it, but I don't know much about the advantages and disadvantages of an EU accession.

- I think each individual will be able to prosper in the EU but one has to be inventive, capable, because capable people can be successful anywhere. And now with the possibilities in the EU... certain things, professions and different directions that have been closed until now, will open up. For example international relations and translating and similar jobs will become more and more important. But there are also disadvantages. For example, those who are not really qualified will not survive in this system. Only the fittest survive in the capitalist system as it functions today.

## **Teo**

- Because there will be job opportunities in other countries. But the period of time during which we prepare for the EU will not be fine, it will be rather annoying. Probably because our currency will drop a great deal. I think this will be the most critical time- after the introduction of the common currency it will be ok.

## **Barbara, Jasmina, Maruša**

- there are probably positive and negative aspects.
- Yes, employment I think,... I don't know...

## **Andrej, David**

- I think EU accession is good for us economically and for us students. We are really interested in studying abroad and of course job opportunities abroad. Slovenia is still a province but I think it will be quite nice working abroad. I think this is crucial...
- In 2007 with the free flow of people I'll immediately leave for France. I don't know. I think it's good to have these opportunities in Europe. In Slovenia you are "imprisoned" but now we will be able to go wherever we want.

## **Amadeja, Anja**

- Well there are probably positive characteristics.
- But there are also negative characteristics.
- For example – it is a positive fact that we will have the Euro...
- For example closely linked trade, and markets everything will become more European.
- I like it. I just hope that prices won't go up and that they won't be the same as in other European countries.
- Yes.
- Because then we'll be in misery.

## **Dejan**

- EU, I don't know. I think it will be good for Slovenia, for the state and for schooling
- it will be easier to get educated. I think it's good.

**Translation, Slovenian**  
**My opinion about....EU and NATO**  
**RTV, Slovenia**

***Luan, Milenko, Aleš, David***

- Nekaj malega sem spremljal samo ne vem kdaj bo EU. Saj mi bomo šli tja samo plače bodo pa še vedno iste, cene bodo pa šle gor. To se meni ne dopade.
- Mislim, da EU po eni strani dobro, po eni strani pa ne,. Za tako malo državo kot smo mi, da to ni ta pravo.
- Brez veze. Zakone so spremenili. Zdaj moraš zaradi nekega skuterja čelado imeti na glavi pa registriranega imet, pa izpit imet. To ni smiselno.  
Mislim.....bedasto....
- Prav imaš, samostojna država bi mogli biti. Ne, saj po eni strani je vredno da gremo v EU, na primer.
- Kao..
- Uveljavljeni bomo malo bolj drugje. Potem več možnosti boš imel če boš šel kam drugam, kaj takega, drugo pa tak....
- ...ne bo kaj pomagalo.
- Ne bo dobrega, nič dobrega se nam ne piše.

***Andreja, Lidija***

- Jaz mislim, da bo boljše, če bomo v EU, ko bomo.
- Po moje tudi. Že glede tega stališča, že glede študija. Zelo ugodnosti so, da lahko greš v tujino študirat. Potem tudi možnosti zaposlitve, spoznavat druge ljudi, druge kulture.
- Ja za mlade to pride v poštev, za starejše pa bolj težko, zato pa so starejši proti temu.

## ***Primož, Sergej***

- Ja, nekaj sem gledal, ne. Vredu je, da bomo imeli EVRE, pa da se bo davek tudi znižal. Samo za NATO pa nisem, ker če se bo kaj drugje zgodilo...na primer Nemčija, če bo imela kakšne težave, bomo tudi mi vpleteni.

## ***Tina, Domen***

- O joj, čist sebično je mogoče zaradi tega, ker mi francoščina dobro gre, pa bom lahko dobila kako dobro službo. Drugače pa.....ni mi fajn priznat, ne spoznam se tak dobro, nisem seznanjena tak dobro s prednostmi in slabimi stranmi vključitve v EU.
- Jaz mislim, da bo v EU lahko prosperiral vsak, ki je znajdljiv, sposoben, ker mislim da če si sposoben lahko kjerkoli prosperiraš. Zdaj če pa je to še priložnost kot je EU... recimo določene stvari, določeni poklici in različne smeri se bodo odprle, ki do zdaj niso bile odprte. Recimo mednarodni odnosi bodo zdaj veliko bolj aktualni, prevajalstvo, podobne službe, se bo povpraševanje še pojačalo. Po drugi strani pa ima tudi slabe lastnosti. Recimo, tisti pa ki niso sposobni bodo pa sorazmerno hitro eliminirani v smislu, da ne bodo imeli preživeti v tem sistemu. V tem zdajšnjem kapitalizmu pravzaprav, ki določa, po razvojnem nalogu preživi namočnejši.

## ***Teo***

- Zaradi tega, ker bo možnosti zaposlitve tudi v drugih državah. S tem, da ne bo fajn to predvsem zaradi tega, ker bodo nam ta čas, ko se bomo mi pripravljali za vstop, bodo zelo tečni. Zaradi tega, ker nam bo valuta verjetno precej padla. Mislim, da bo ta čas zdaj najbolj kritičen, ker ko pa bomo imeli skupno valuto, pa mislim, da bo šlo.

## ***Barbara, Jasmina, Maruša***

- So verjetno pozitivne in negativne stvari.
- Ja, zaposlitev po moje, ..ne vem...

## ***Andrej, David***

- Vključevanje v EU se mi zdi tako iz ekonomskih pogledov kot iz pogleda dijaka oziroma študenta zelo dobro. Študij – predvsem nas mlade zdaj zanima ta študij v tujini, potem pa tudi možnost dela v tujini, kar me zelo privlači, ne. Sicer Slovenija je še vedno dežela, ampak mislim, da bo zelo lepo delat v tujini. Mislim, da je to ključnega...
- Ja, v bistvu 2007 bi naj bi prosti pretok ljudi in takrat grem s prve v Francijo. Ne vem. Lepo mi je to, da imam v Evropi priložnost. V Sloveniji si zaprt, zdaj pa boš odprt in boš lahko šel kam ti bo pasalo.

## ***Amadeja, Anja***

- Ja, valjda so pozitivne lastnosti.
- Samo,, so pa tudi negativne.
- Na primer – pozitivno je to, da bo Euro pri nas...
- Na primer – povezano trgovanje, pa tržišče bo zdaj spet tak, tak bolj evropsko, pa to.
- Meni se zdi to fajn. Samo upam, da se ne bodo cene povišale, da ne bodo enake evropskim.
- Ja.
- Ker te pa smo v bedu.

## ***Dejan***

- Ja, EU. No, ne vem. Pa mislim, da bo to dobro za Slovenijo, za državo, potem tudi za šolanje, se boš v svetu lažje šolal, pa to. Ne vem. Mislim, da je dobro.
