Baltic sea project
YLE, Finland

There are many countries around the Baltic Sea. The Baltic Sea is quite an unusual sea because of the brackish water – a mix of salt water and fresh water.

The wildlife in the Baltic Sea and in the countries around the Baltic Sea is also quite unique. Our programme has visited Gargzdai in Lithuania, where many pupils work to preserve the environment around the Baltic Sea...

Reporter: Janne Lindberg
Camera: Eugenijus Kryzanovskis
Sound: Vidmantas Blazys
Editing: Janne Nyysönen
Place of shooting: Gargzdai, Lithuania and Varena, Lithuania

Duration: 4'19

Music

00:00-00:25

00:51-01:18

01:27-01:29 (= 54 seconds)

Tune: Battle with a smile

Composed by: unnamed

Performed by: Ken Suguro

Record company: Kool Kat

Record ID: KKAT 007

01:48-02:20 (= 32 seconds)

Tune: Breathe in

Performed by: Howie B.

Record company: Wall Of Sound (Virgin)

Record ID: 7243 8499102 9

Picture	Sound
The pupils get out of the bus and head into the forest	
Aurimas Dauksys, 13 years ("standup")	00:06 - 100% We are close to the forest and we are going to hang birdhouses that we have made ourselves.
Hanging the birdhouses	
Aurimas Dauksys, 13 years	00:21 -100% I was making it for a woodpecker, but maybe a wren* will move into the house. It will be a home for the birds and their nestlings. It's safer for small birds. Other birds can't destroy the nest.
	*) troglodytes troglodytes in latin
Romas Mazonas, forester	00:34 - 100% Here there are only a few forests with hollow, withered trees where the birds can nest. That's why we have to build birdhouses for the birds to breed in.
Hanging the birdhouses	00:52 Speak The school in Gargzdai is involved in a project called Green Circle Schools. Also involved are schools from Denmark, Poland, Russia, Latvia and Sweden. The schools keep in touch and work together for the environment around the Baltic Sea.

	<p>Also the older students at the schools are interested in the environment.</p>
<p>Ausra Tamosauskaite, 17 years</p>	<p>01:19 - 100% (English) We are at school now and here you can see our geology museum.</p>
<p>Simona Krolyte, 17 years</p>	<p>01:23 - 100% (English) We are coming here every week so let's look closer.</p>
<p>Ausra Tamosauskaite, 17 years</p>	<p>01:29 - 100% (English) Here you can see many kinds of stones.</p>
<p>Aurimas Kundrotas, 17 years</p>	<p>01:34 - 100% (English) He's picking trash from the bush. reporter: When do you do that? Twice a year. It's more entertainment, not work.</p>
<p>Pupils get out of the bus, birdwatching, birds</p>	<p>01:50 Speak: But there are enviromentally conscious pupils all over Lithuania. This is a bird club in a school in Varena.</p>
<p>Mingaile Butkeviciute, 14 years</p>	<p>02:17 - 100% Today we were counting waterbirds. We write everything down and make statistics.</p>
<p>Svajja Sabaliauskaite, 17 years</p>	<p>02:24 - 100% There are a lot of mallards in this area. We didn't find any other species.</p>
<p>Karolis Pigaga, ex-head of the bird club, 18 years</p>	<p>02:32 - 100% I want to know what kind of birds live in my area, how many birds there are and how they change.</p>
<p></p>	<p>02:43 - Speak: These pupils are also involved in a Baltic Sea programme. This one is simply called Baltic Sea Project - or B.S.P.</p>
<p>Sigitas Juzenas, BSP coordinator in Lithuania</p>	<p>02:52 - 100% (English) The BSP project is a project for schoolchildren and they can do observations of nature and later they can share this information between schools, between countries.</p>

Mingaile Butkeviciute, 14 years	03:08 - 100% I think this is interesting. You can learn a lot about the secrets of nature.
Saulius Bickauskas, 14 years	03:20 - 100% I like more being out in nature, away from the noise in the city. Here I can relax.
Sigitas Juzenas, BSP coordinator in Lithuania	03:30 - 100% (English) In Lithuania actually we have a problem now with Ignalina power plant. It's a big problem, I think, and we need to learn (teach) schoolchildren to make a good decision and I think that they can solve these problems - in the future.
